

IVIQ Round 1 (numerical)

Do not expect unique solutions.

But also don't expect that every logical solution will be considered correct.

You must provide the most deductive and the most regular solution.

Only one answer per item is allowed. Explanations are also allowed.

You have two weeks to solve 10 puzzles.

It seems easy, but it isn't.

- 1) 899, 29667, ?
- 2) 1, 2, 2, 3, 2, 4, ?, ?, ?, ?, ?, ?
- 3) 7, 3, 3, 3, 2, 2, 2, 7, 7, 7, 9, 12, ?
- 4) $44513 : 88922 = 13 : ?$
- 5) $(\sqrt{2}, 5) : (\pi, 7) = 13 : ?$
- 6) 2-1, 31, 24, ?
- 7) 284120, 174913289520200, ?
- 8) 2.1, 3.27, 4.625, ?
- 9) $xyx, yyx, xyy, yxx, yyy, ?, ?, ?$
- 10) 123456, 777, 147, ?, ?, ?
